

90-Day AI/ML + DSA Execution Timetable

Daily Structure (Monday - Saturday)

- 6:00 PM – 8:00 PM → DSA (1 Hard + 1 Medium + Reflection + Re-implementation)
- 8:00 PM – 8:45 PM → Dinner + Reset (No scrolling)
- 9:00 PM – 10:30 PM → ML / Math (Alternate Days)
 - - Mon/Wed/Fri → Math (Derivatives, Linear Algebra, Probability, Derivations)
 - - Tue/Thu/Sat → ML Implementation (Linear Regression, Logistic Regression, Regularization)
- 10:30 PM – 11:00 PM → Aptitude Practice (Quant + Logical Reasoning)
- 11:00 PM – 11:30 PM → Interview Prep (Resume, Mock Answers, Concept Explanation)

Sunday Plan (Review + Depth Day)

- Morning: Re-solve 5 hardest DSA problems of the week (No hints)
- Afternoon: ML Mini Experiment (Change dataset, compare MSE vs MAE, adjust learning rate)
- Evening: Weekly Review (Track problems solved, hint %, ML concepts mastered, distractions)

Weekly Targets

- 12–15 DSA problems
- 3–4 ML implementations
- 3 math derivations fully understood
- 100+ aptitude questions
- 2 mock interview explanations recorded

90-Day Milestones

- Month 1: Arrays, Sliding Window mastery + Linear & Logistic Regression from scratch
- Month 2: Trees, Graphs + Regularization + Resume Project
- Month 3: Advanced Patterns + System Design Basics + Internship Readiness
